## Work History

### Frontend Software Engineer II

Mar 2021 - Current

Service Management Group Inc.

Remote

Acted as the company's Angular and general frontend subject-matter expert. Spearheaded a greenfield micro-frontend solution by leveraging Webpack's Module Federation that is used by all internal teams. Created a robust Angular component library that is used internally by all internal teams. Updated legacy apps from AngularJS to Angular while simultaneously adding new functionality. Collaborated with development, UX, and product leads to define and achieve technical requirements.

### Full Stack Software Engineer

May 2019 - Mar 2021

Kingland Systems Corporation

Ames, Iowa

Designed and implemented components of various enterprise data management tooling. Was a subject-matter expert on Angular framework. Responsible for implementation of test-driven software based on software designs and requirements. Part of high-level production maintenance on critical solutions. Started as intern and progressed to full-time employment.

### Full Stack Developer

Aug 2015 - May 2019

Environmental Health & Safety

Designed and implemented software that manages the use, maintenance, and disposal of all materials and equipment used in campus laboratories. Single-handedly constructed reporting tools for the DHS, automated the process of generating NFPA 704 and other hazard signs, as well as improved and added to management systems for laboratories and principal investigators.

## Education

### Bachelor of Science: Management Information Systems

2019

Iowa State University

Ames, IA
